

The EAA Young Eagles Build and Fly program is an intensive remote control (RC) model building and flying initiative to introduce youth to aircraft construction and the fundamentals of flight. There is no cost for youth participation.

EAA105 adult mentors will be working with youth ages 13-18 to participate in a build and fly program. We will be building a wood and “fabric” remote control airplane (as pictured above) over approximately 4-5 weekends.

When: Starting 5/5/24 Sunday afternoons 12:30 until 2:30 pm

Where: Twin Oaks Airpark—Hanger G1 (Home of EAA105)
12405 SW River Rd, Hillsboro, OR 97123

Cost: FREE

Youth will be hands on building the flying surfaces for the airplane. They will additionally have lots of opportunities to learn to fly remote control airplanes using our RC flight simulator. We will also take a small airplane and fly it inside a hanger at the airport so youth have a chance to fly an actual RC airplane. Once our project is complete we will take our completed aircraft out to the Fly-A-Ways airfield to fly them.

EAA105 will sponsor youth participants to become members of The Academy of Model Aeronautics - “Your Passion - Your Hobby - One Community”

Please email **buildandfly@eaa105.org** to let us know you will be attending.
